

Skill is the name of the game! JDA Demand Certification Can Help You Win

Top 5 reasons you need to forward this document to your manager about JDA Demand Certification Programs.

JDA's newly revised and launched demand certification and education program enables planners, analysts, and other key functions of the planning and demand forecasting business groups to maximize their skills, visibility, and opportunities to improve productivity and profitability.

This three level certification program allows you to move from foundational knowledge to more advanced topics and a strategic understanding of the demand planning & forecasting business process as you grow in your role and job responsibilities.

1. **Relevant.** 2½ days of role based training combines process, best practice, and technology into blended learning paths.
2. **Applicable.** Hands-on, interactive education. Through elearning, workshops, business case analysis, & instructor you will bring back knowledge you can use right away.
3. **Innovative.** Designed by leaders in the industry sharing with you their business experience from your field. That can help guide you so that you can lead the way and understand how to work to solve emerging trends and supply chain operations.
4. **Valuable.** So much information, so little time. Gain access to exceptional education that you can put to work in just 2 short days and make an impact to the bottom line.
5. **Visible.** Use your new knowledge to help your managers. The instant credibility that goes with certification helps to show what you know with documented verifiable evidence of your skills.

JDA Certification does more than just add fancy letters to your name.
